
How to Tuesdays

Good Egg/Bad Egg

How to find the proverbial "good egg". Run a good size bowl full of cold water. Add your egg (DON'T CRACK IT!). If the egg lays on the bottom, it's fresh. If the large end of the egg floats a little higher, it's 7 to 10 days old. If the egg stands straight with the large end up, it's at least a month old. If it floats, don't eat it!
